Summary

With 3 years of experience in web development my career covers a variety of projects in developing and implementing new functionality for e-commerce and business management systems. I am constantly looking for new challenges in my professional development and this is what makes me grow professionally and personally.

Job Experience

Vindevs – Front-End Developer

2021- till present

- mastered the knowledge and understanding of SDLC,
- initiated and led technology discussions with the stakeholders,
- conducted deep and frequent discussions with designers to improve the project,
- maintained close communication on new features with back-end developers,
- worked on website performance optimization,
- mentored less experienced teammates.

I worked on multiple projects in e-commerce and business management systems:

- a business card site about the company supported by an admin panel with the functionality of adding content to the site,
- 5+ full-fledged online stores for e-commerce,
- several CRM systems for customer data management and lead generation,
- an ERP system for user lookup with the functionality of data retrieval and data visualization.

Languages

English – Upper-Intermediate (B2), Ukrainian — Native.
