VITALIY PARASOCHKIN

FRONT-END DEVELOPER

SUMMARY

As a developer with 2 years of work experience, I had the opportunity to work in a team on various projects: from the development of ordinary online stores to the CRM system. I'm always happy to take on new challenges and continue to learn and grow as a developer.

So if you're looking for a qualified developer to help bring your project to life, I'm here to help!

SKILLS

Web application design and development; UI components development; Complex data processing services development; Front-end development cycle experience; ; New functionality implementation;

TECHNLOGIES

FRAMEWORKS & LIBRARIES

ReactJS, Redux, Redux Tollkit, React router dom, React API Context; Material UI, Bootstrap, Reactstrap;

CORE TECHNOLOGIES

JavaScript, TypeScript(familiar), HTML, SCSS, Browser API, REST API.

TOOLS

VS Code, ESLint, Git.

JOB EXPERIENCE

FRONT-END DEVELOPER

VINDEVS

October'21 - Present

At first, I created e-commerce sites. After that, and until now, I am working on a crm system type project. Here, from the very beginning, I independently thought out the architecture of the application, defined the technology stack, learned to work with other developers as a whole. I worked closely with the team, led technology discussions, proposed new ideas and features,discussed and challenged features with the CEO to ensure all solutions were well thought out and ensured we were delivering valuable solutions to the project.
